ABOUT

Cybersecurity student at the Western Sydney University, graduating in Spring 2026. I develop, test, and implement security-focused applications, programs, and websites. My projects include website design and development, database configuration, and software development. I am currently seeking internship opportunities in cybersecurity, engineering, and web design to further develop my technical skills and industry experience.

PROJECTS

Resume Website

Designed and developed a resume website in HTML, CSS, BootStrap. Building based off from a brand identity of a cybersecurity resume website.

Database Configuration

Configured the database to establish the link between the host and server. The PC running Windows 11 connect via wireless and wired networking to network switches, router or network interface cards.

Business Checkout Program | Java

Developed a checkout program that processes customer orders, calculates item quantities and prices, and determines the overall purchase cost.
